Dear Mr. Clemenson:

I enclose a draft of a manuscript to be submitted to NATURE reporting studies of pollen from samples of yellow rain, including two groups of samples received from Dr. Gordon Niesh.

We would be most grateful for your guidance in making proper reference to the collection and provision of the samples. Is the circled section of the enclosed text accurate in this respect? In addition, could you let us know in what month and year the rock samples are reported to have been collected? Thank you for your help.

Sincerely yours,

Matthew Meselson
Professor of Biochemistry
